

The benefits of medical inventory management under a single cloud

FUTURE PROOF YOUR MEDICAL INVENTORY MANAGEMENT

There's no shortage of data-collection tools in the healthcare sector, but as more technology is added over time, organizations end up with multiple software systems and siloed data.

MANAGE ALL OF YOUR MEDICAL INVENTORY WITH ONE CLOUD MANAGEMENT SYSTEM

THE BENEFITS OF A 'ONE CLOUD' MANAGEMENT SOLUTION

The **IDENTIPLATFORM** is powered by AI and machine learning technology.

Find out **FOUR** major advantages of the IDENTI Platform:

1 SUPPORTS MULTIPLE SOLUTIONS

Analyzes data collected from multiple data sensing tools across different hospital departments

2 Quick, automated item identification via a global SKU database. Accurate documentation, including full UDI capture.

AUTOMATED ITEM IDENTIFICATION & DOCUMENTATION

3 USEFUL MANAGEMENT INFORMATION

Alerts - Recall and expiry alerts
Metrics - Real time inventory vision
Reports - Inventory & usage reports
Insights - Meaningful planning data
Requisitions - Automatic orders
Data provided depends on the solutions used.

4 Easy integration with ERP, EMR and MMIS. Supports perpetual Item Master maintenance. Connects to suppliers' ERPs for complete transparency & synergy.

INTEGRATION & DATA SHARING

The **ONLY** single-cloud solution for the management of ALL types of medical inventory

Medical devices & implants

Bulk medical supplies

Point of care Utilization data

TotalSense

Kanban & PAR automation tools
