# THE EVOLUTION OF TECHNOLOGY

Point-of-care Supply Documentation for the Modern Age

The Journey from Stickers to Image Recognition Sensors

	Manual/ sticker Implant Log	EMR dropdowns/ keying in information	POU Software with barcode/ RFID/QR code scanning device	Digital image capture and AI
Digital documenting full UDI item data and charge capture with proof-of-use	low	medium	medium-high	high
Bill-only and unpacked items Ability to automatically record nuts, bolts, screws , or off-contract items	high	low	low	high
Data insights Data metrics, reports, analytics of case costing, comparison between surgeons, cost affective products management, etc.	low	medium	medium	high
Ease of use Ability to simple and fast charting and reporting usage into the patient record	low	medium	medium	high
Reliance on local Item Master Does the system need pre-loading in order to find a match?	high	high	high	low
Catalog maintenance Does the system fix "dirty data" on the fly?	low	low	low	high
Labor intensity Level of staff involvement required to fix reporting and inventory related issues	high	high	medium-high	low
On-the-spot safety alert of expired and recalled products, acting as the `last line of defense`	low	low	low	high
Ease of recall Searchable batch history for ease of recall retrieval management	low	medium	medium-high	high
